Why Most Students Fail to Get Tech Jobs

This is why MOST students never get hired
Months of learning... still no job offers

We Don't Just Teach

We Train You to Build, Deploy & Secure Real Applications

- ✓ Build real applications from day one
- ✓ Work with tools used in real companies
- ✓ Deploy your apps on cloud (real environments)
- ✓ Learn how to secure applications from threats
- ✓ Get step-by-step mentorship until job-ready

This is how you become a job-ready tech professional companies hire

Why Students Choose Aerovant Academy

Build secure
apps
companies
expect

Real-world
project
experience

Deploy
apps on
cloud

Industry-
level coding
practices

Career-
focused
training

Mock
interviews &
preparation

What You Can Do After **90 Days**

- ✓ Build real apps you can show in interviews
- ✓ Create backend systems used in real companies
- ✓ Deploy your projects live like real products
- ✓ Understand how apps are secured in real systems
- ✓ Be confident to attend real interviews
- ✓ Build a portfolio that attracts recruiters

You won't just learn — you'll build what recruiters expect

Your Journey from

Beginner to Job-Ready Tech Professional

-Powered By Aerovant Technologies-

FOUNDATIONS

- Learn coding from scratch + problem-solving mindset

FRONT-END

- Build responsive websites like real applications

BACK-END

- Build backend systems & APIs used in real apps

DATABASE

- Design and manage real application data

CLOUD DEPLOYMENT

- Deploy your applications on cloud platforms
- Host real-world projects live

CLOUD SECURITY

- Learn how to secure applications and data
- Control access and protect user information

From coding basics to building, deploying & securing real applications

Real Projects You Will Build

FULL-STACK

- ✓ Build an e-commerce web application
- ✓ Create a blog platform
- ✓ Build a portfolio recruiters notice

CLOUD COMPUTING

- ✓ Deploy applications on AWS cloud
- ✓ Host real-world projects live
- ✓ Manage cloud infrastructure

CLOUD SECURITY

- ✓ Secure web applications from threats
- ✓ Implement authentication & access control
- ✓ Protect user data in cloud systems

Real projects that make you job-ready

Learn What Most Developers **Don't Know**

Go beyond coding — learn how real applications are deployed & secured

- ✓ Deploy applications on cloud platforms
- ✓ Understand how real-world apps are hosted and scaled
- ✓ Learn how applications are secured from real threats
- ✓ Control access and protect user data
- ✓ Write secure and production-ready code
- ✓ Build, deploy & secure real-world applications

This is what makes you stand out

We Don't Just Teach — **We Help You Get Hired**

We support you to:

- ✓ Build a portfolio recruiters notice
- ✓ Showcase cloud-deployed & secure projects
- ✓ Prepare for real job interviews
- ✓ Create a resume that gets shortlisted
- ✓ Practice real interview questions from companies
- ✓ Build projects you can showcase to companies
- ✓ Gain confidence to crack interviews

We guide you until you get job-ready

What our **Students Says**

“

“Before this, I only knew theory. Now I’ve built real projects and understand deployment on cloud. I feel much more confident attending interviews. Built 6+ real projects during the program.”

”

Tharscini
STUDENT

“

“I had no real project experience before joining. Here, I worked on cloud security labs and built real applications. This helped me understand how systems actually work. Worked on real cloud deployments ”

”

Harish
FRESHER

“

“This program helped me learn cloud, security, and real-world development. I now understand how applications are built, deployed, and secured. ”

”

Ezhil
FRESHER

“

“The mentorship and practical sessions improved my cybersecurity skills. I learned how to secure real applications and gained confidence for interviews. Completed hands-on security labs”

”

Shalini
STUDENT

From zero knowledge to building real-world applications — this is the difference

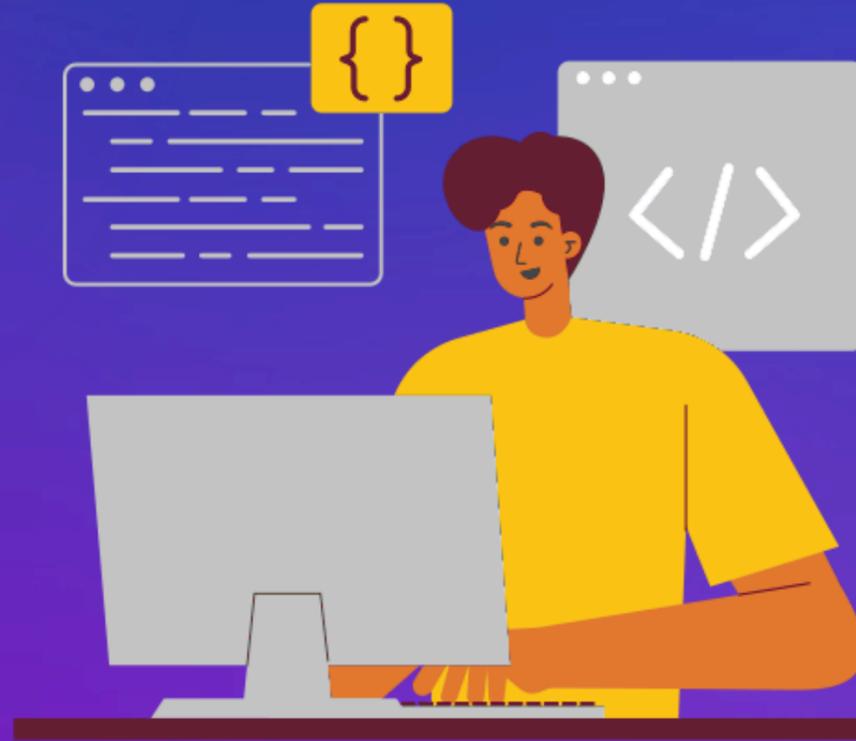

About **Aerovant**

- ✓ **Aerovant Academy** focuses on practical, job-ready skills.
Aerovant Technologies builds real-world applications.
- ✓ **Students learn → build → and apply in real environments**
